*For ALL MODELS of*  
**Mack Chain-Drive Trucks**

Fits all sizes of Sprockets 12 to 18 Tooth.

GREB NO. 70 and 70X PULLERS are made of HIGH GRADE STEEL, simple to operate. ONE man can apply it to the work. The screw is 2 by 22 inches long with a fine thread. The pulling nut is locked in the puller by a ring in its head.

**NO. 70 GREB SPROCKET PULLER** is designed to take all sprockets from 12 to 15 Teeth inclusive. Shipping weight 75 lbs. Price \$40.00.

**NO. 70X GREB SPROCKET PULLER** is designed to pull all sprockets from 12 to 18 Teeth inclusive. Shipping weight 100 lbs. Price \$45.00.

## GREB DIFFERENTIAL WORM GEAR PULLER

**GREB NO. 70Y.** Especially designed for pulling Differential Worm Gear on the TWIN COACH. Similar to No. 70X. A Powerful and efficient Puller for removing the gear without damage. Screw 2 by 16" long. A one man tool; shipping weight 100 lbs. Price \$45.00.

**No extra pieces to get lost**

You cannot go wrong. It's a wonderful piece of equipment.

## Greb Extractor and Puller

No. E5, Price \$12.00

Especially designed for removing tapered roller bearing cups in transmissions, steering pivots, front and rear wheels, differential housings, pinion gear housings, worm gear housings, without ruining them or destroying the unit holding them. No more chiseling, driving, boring, splitting, burning or any other ruinous method for removing the Cups!

The E5 Extractor has two sizes of Screw Wedges (A) and two sizes of Sub Frame and Jaws (B) which make the combinations for extracting cups from  $1\frac{1}{2}$  inches up to  $3\frac{7}{8}$  inches.

### Greb Extractor

No. E6, Price \$8.50

#### For Removing Races and Bushings

Positive grip. The extracting is all done by the wedge, which forces the hooks into or behind the part to be removed. The hooks can not spring and let go, as the more force applied the harder the wedge forces them outward.

No. E6 is a Two-arm Bushing Extractor, useful on small bearings, bearing sleeves, cups, races, etc., from  $\frac{3}{4}$  in. to  $1\frac{3}{4}$  in. inside diameter.

**Directions**—Adjust stand so legs will rest on part that contains bushing, back off top nut and insert jaws as far as you can, then tighten top nut and remove bushing.

### Greb Extractor

No. E7, Price \$10.00

#### For Removing Bearings, Bearing Sleeves, Cups, etc.

Designed for heavy duty work such as Timkens pressed into housings, wheel hubs, etc. First remove top nut and take off stand; then back off locking nut so the frame will slide up on screw enough to allow hooks to pass through part to be extracted, then pull up on the screw, which will force the hooks behind the part, tighten lock nut which will lock the Extractor while stand is placed in position and top nut tightened.

No. E7—Two-arm Extractor. Capacity from  $1\frac{1}{2}$  in. to  $3\frac{1}{2}$  in.

## Greb Tapered Roller Bearing

### and Cone Puller for Passenger Cars

No. 9 Puller (without adaptors), price \$15.00. Adaptor, per set, price \$3.00.

### Automatic Axle Shaft Cone Puller

A practical Bearing and Cone puller for removing (without damage) the Cage, Cone and rollers of Tapered Roller Bearings from pinion Shafts and rear axles.

GREB NO. 9 adaptors are machined to fit each and every tapered roller bearing. The outer side of the adaptors and inner base of the Puller are the same taper which gives a secure and Positive Grip on the bearing to be pulled.

The No. 9 Greb Puller is a Master Tool which service is unlimited. When ordering your adaptors specify the manufacturers serial number shown on the tapered roller bearing or printed in their specification sheet. Each bearing is different in diameter. BY ORDERING SPECIAL ADAPTORS THIS TOOL CAN ALSO BE USED TO PULL THE PUMP GEAR ON THE SIX CYLINDER AUTO CAR AND DIAMOND T TRUCKS.

### Greb Ball Race Puller No. 10-H

Price, \$8.00

Universal Puller. Can be locked into any ball race from  $\frac{5}{8}$  to  $1\frac{1}{4}$  inches without any changes, thereby making it a universal ball race Puller. Has a reach of  $4\frac{1}{2}$  inches and  $9/16$  inches diameter screw. Shipping Weight 5 lbs.

### Battery Terminal Puller and Small Gear Puller

No. 67, Price \$1.85

Slim jaws make this a practical puller for removing Battery Terminals. Is a splendid puller for electrical and general small work about the bench. Made of Drop Forging. Weight 2 lbs.

### Battery Terminal, Generator Bearing and Gear Puller

No. 62, Price \$7.50

A quick, powerful general Puller with scoop concaved jaws, for removing battery terminals, generator bearings and gears. Made of drop forgings and high grade steel. Jaws open to 4 inches. Shg. Wt. 3 lbs.

**EFFICIENT**

## GREB Automatic Grip E8 Special Extractor FOR REMOVING Tapered Roller Bearing Sleeves or Cups

Range  $1\frac{1}{2}$ " to 7"

**GREB E8 SPECIAL** Three Arm Extractor is designed for Heavy Duty work. Shipping weight 40 lbs.

Price \$24.00.

**DIRECTIONS**—First remove top nut and take off frame stand; then back off locking nut so the Sub Frame will slide up on screw enough to allow hooks to pass through part to be extracted, then pull up on the screw, which will force the hooks behind the part. Next tighten lock nut. This will lock the Extractor while stand is placed in position and top nut tightened.

### Description of GREB E8 Special Extractor Parts
